

# Online shop testing

<https://demo.opencart.com/>

That's the site referenced for testing browsing, adding to cart, checkout, and order management

## 1) Ahmed Mosaad Abosreea mohammed

### First story

As a user, I want to add, update, and remove items from the cart. This ensures I can manage my purchases before checkout. The system must correctly handle quantities, removals, and price calculations. Test Cases (compact list):

1. Add single item
2. Add multiple items
3. Update quantity
4. Remove item
5. Empty cart message
6. Cart persistence after refresh/login
7. Correct subtotal, tax, and total

### Second Story

As a user, I want to securely complete my purchase. This guarantees my order is confirmed and delivered. The system must validate payment, address, discounts, and send notifications. Test Cases (compact list):

1. Valid checkout flow

2. Invalid payment details
3. Address validation
4. Apply discount code
5. Order confirmation page
6. Email notification
7. Payment gateway timeout handling table for these test cases

## 2) Karem elkazafy abdelaziz abdelhamed

### First story

1. Add single item
2. Add multiple items
3. Update quantity (increase/decrease)
4. Remove item from cart
5. Empty cart displays correct message
6. Cart persists after page refresh or login
7. Verify subtotal, tax, and final total are calculated correctly

### Second story

1. Add single and multiple products
2. Handle different categories
3. Display all items properly
4. Update quantities

- 5. Prevent duplicates
- 6. Persist cart data after refresh
- 7. Calculate totals accurately

### 3) Mina Nosohy Grace Hanaa

#### First story

As a user i want you to check :

User Registration - Valid Data Search Product - Existing Item Search Product - Non-existing Item Checkout - Valid Payment Checkout - Invalid Payment

#### Second story

Filter Products by Category Order History - View Past Orders Order Tracking - Valid Order Order Tracking - Invalid Order Profile Update - Change Password

### 4) Jana Adnan Hamdy Mohammed

#### First story

User Story :

As a registered user, I want to add products to my shopping cart from the product listing or product details page, so that I can review and purchase them later. The system should allow adding available products, show confirmation messages, update the cart count, and handle cases like out-of-stock products or invalid actions properly.

## Second story

User Story :

As a customer, I want to proceed to checkout after adding products to my cart, so that I can enter my details, choose shipping and payment methods, and successfully place an order. The system should guide me step by step, validate required data, and confirm the order at the end.

## 5) Ahmed Karam Sabry

### First story

As a guest user

I want to add product from category page

So that I can quickly shop

Acceptance Criteria:

للمنتج المتاح Add to Cart يظهر زر

يتم إضافة المنتج للكارث بعد الضغط

success message يظهر

عدد العناصر في الكارث يزيد

### Second story

As a user

I want to add product from details page

So that I can confirm product before adding

Acceptance Criteria:

الكمية الافتراضية تكون 1

المنتج يضاف للكارت

السعر يظهر بشكل صحيح

يتم عرض المنتج في صفحة الكارت

## 6) Ali Yehia Mohammed Saleh

### First story

As a user i want : "Search with a valid product name" "Search with a non-existent product" "Search with an empty input" Search using a partial product name "Search with Case Insensitivity" "Search using special characters" "Verify product details in search results"

### Second story

As a user i want : "Add product from the home page" "Add product from Product Detail page" "Add the same product multiple times" "Add product and refresh page" "Verify Cart Overlay- Dropdown content" "Update product quantity in Cart page" "Remove product from Cart"

## 7) Omar Hassan Salah Abdelhamid

### First story

As user i want : Verify homepage loads successfully      Verify product browsing by category      Verify product details page      Verify search functionality      Verify adding product to cart      Verify cart quantity update

## Second story

User: Verify removing product from cart Verify checkout process Verify guest checkout  
Verify payment method selection Verify order confirmation page Verify login functionality
